

PLEASE support the efforts of XM Radio to continue broadcasting live traffic and weather on their system. I find the depth and quality of their broadcasts to be greatly superior to the local broadcast stations on FM, and I get the report instantly, not after a series of commercials. I am willing to pay for the service each month, and no one should inhibit the competition that allows them to provide the service. Competition in business is what our economy is all about... FM and AM radio has to improve their business practices to keep up, but that's how we get the best service for the lowest cost.

Please do not bridle XM radio with any inappropriate regulations... it should be the opposite.

Thanks
